Get the latest evidence-based information on women and heart disease from a project led by the U.S. Department of Health and Human Services’ Office on Women’s Health in collaboration with the National Heart, Lung, and Blood Institute of the National Institutes of Health. These slide sets, videos, and Medscape CME modules were developed by a team of women’s health and cardiology experts. Materials have been updated to reflect the new 2011 American Heart Association evidence-based guidelines for prevention and treatment of cardiovascular disease among women. Updated CME/CE modules from Medscape are also now available at:

www.womenshealth.gov/heart-truth
